

Statement from Fridays for Future Russia on the military invasion of Ukraine by Russia

"We, the activists of FFF Russia, reject any military confrontation.

At a time when the world is suffering from climate, environmental and other crises, war will only aggravate these crises, but will not contribute to their resolution. At this time, all conflicts must be resolved through diplomacy, not through the blood of civilians in other countries.

We express our solidarity and support for our friends from Fridays For Future Ukraine and now try to give them all possible help.

We do not want to be associated with blood and death because we never wanted that for ourselves and our friends. The actions of our government are not our actions.

Fridays For Future Russia was, is and will continue to be against any military action, no matter how "fair" it is presented by state propaganda. War is not fair.

People in Russia, please contact your relatives and acquaintances from Ukraine, give them words of support and provide any help you can.

People in Ukraine, please try to stay safe and take care of yourselves.

We will continue to fight for peace and justice for all inhabitants of the planet, especially in the current conditions."
